

<Frame cols = "30%, 60"  
 <Frame name = "Navigation"  
 <Frame ~~name~~

Question Two [20 marks]

1. write a CSS that makes all text 1.5 times larger than the base font of the system and colors it red. [5 marks]

```
font
{
font-size : 150% ;
color : red ;
}
```

5

2. Write a CSS rule that changes the color of all elements with attributes CLASS="Move" to green and shifts them down 25 pixels and right 15 pixels. [5 marks]

```
.move
{
background-color : green ;
margin-top : 25px ;
margin-left : 15px ;
}
```

put 3/4

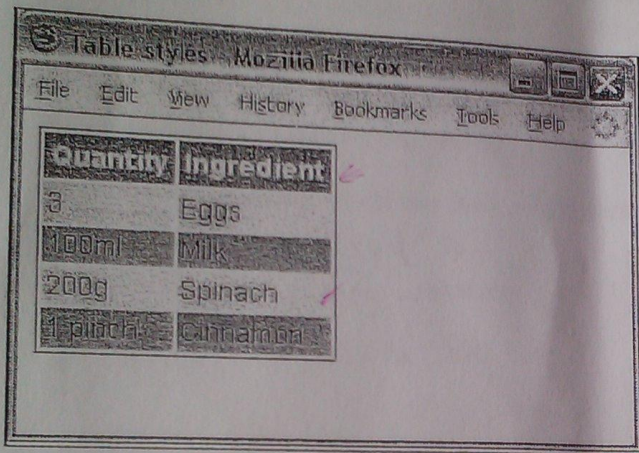

3. Take a look at the following XHTML page: [10 marks]

```
<html>
<head>
<title>Font test</title>
<link rel="stylesheet" type="text/css"
href="tableStyles.css" />
</head>
<body>
<table>
<tr>
<th>Quantity</th>
<th>Ingredient</th>
</tr>
<tr class="odd">
<td>3</td>
<td>Eggs</td>
</tr>
<tr>
<td>100ml</td>
<td>Milk</td>
</tr>
<tr class="odd">
<td>200g</td>
<td>Spinach</td>
</tr>
<tr>
<td>1 pinch</td>
<td>Cinnamon</td>
</tr>
</table>
</body>
</html>
```

of the system and

11.11.12

Now create the tableStyles.css style sheet that makes this example look like it does in the figure below.

| Quantity | Ingredient |
|----------|------------|
| 3        | Eggs       |
| 100ml    | Milk       |
| 200g     | Spinach    |
| 1 pinch  | Cinnamon   |

Don't worry about getting the sizes exactly the same as the screenshot, but do make sure you have padding in the cells and a border around the outside.

background-color: red;

610

1px

padding

height: 50px;  
width: 350px;  
margin-left: 3px;  
border-style: solid;  
padding: 1px;

rite an HTML document that will do the following. [20 marks]

1. Create a registration form containing boxes for FullName, EmailAddress, UserName, Password and ConfirmPassword and dropdown box for city. The City dropdown box that lists the city names, Ramallah, Al Quds, Nablus, Gaza ...etc. be aware so that the value returned from selecting one of the cities is city name. The default option should be Ramallah.
2. Include a submit button that will invoke the PHP script named DisplayRegInfo.php, passing all form info. to that php script.

```
<title> Registration Form </title> </head>
<body>
    <input type="text" id="FullName" size="20">
    <input type="text" id="Email Address" size="20">
    <input type="text" id="User Name" size="20">
    <input type="password" id="password" size="10">
    <input type="password" id="password2" size="10">
    <input type="dropdown" id="dp" size="20" value="Ramallah, Nablus, Gaza">
    <input type="submit" value="Submit" onclick="callPhpPage(FullName, EmailAddress, userName, password, password2, dp.value);" />
</body>
</html>
```
